To whom it may concern

Poljoprivredno gazdinstvo "Family Culum" founded 1979 is family-run company with the experience in growing and producing vegetables, and constantly supply the market with marinated and fresh vegetables, all of the highest quality. In our business, the emphasis has always been on the sauerkraut, because that is the product we are the most known for, and natural conditions for cabbage growing are on our side. Indigenous species of Futog cabbage is an advantage others do not have, and we have abundance of it, so we are able to sell it throughout the year.
